PERSONAL PROFILE

First-year Ph.D. student in the joint programme between the Universities of Milan and Pavia (coursework stage), specialising in health economics. My scholarship, financed by the Istituto Superiore di Sanità (ISS), covers the use of statistical-econometric models for the analysis of population health and registry data; from the second year, my research will be carried out in cooperation with the ISS. So far, I have applied the Synthetic Control Method to evaluate the causal impact of Italy's Regional Recovery Plans on region-level healthcare staffing and patient out-migration.

EDUCATION

University of Milan (La Statale) & University of Pavia — Milan & Pavia, Italy
